

Courier Secure File Transfer Appliance (SFTA)

Accellion Courier Secure File Transfer Appliance (SFTA)

Courier SFTA products are dedicated appliance for business file transfer needs.

- Courier *Standard* SFTA is designed for single-site and medium to high volume users.
- Courier *Enterprise* SFTA is designed for multi-site and high volume enterprises.

Sending files through the SFTA can eliminate nearly 80% of the email load which typically consists of file attachments. And, with automated file and account management tools, there are no more FTP server management chores to attend to or lingering concerns over security and process breaches.

Businesses Send Large Files

Gone were the days when network traffic was limited and security concerns few. IT staff and end users can no longer rely upon FTP and email to transfer files. As the prevalence of large files (>10MB) spread from specialty uses – video and audio files, engineering documents, medical diagnostics, lab results – to the everyday business needs of sending large presentations or high resolution graphics and photos, CD burning, E-mail and FTP are no longer sufficient.

In addition to becoming a disproportional burden on internal processes, CD burning, E-mail and FTP do not meet the regulatory and legal security mandates.

Today's enterprises require secure, ad hoc, and instantaneous sharing of information that an SFTA offers.

Benefits and Savings

Send any size file and folder securely and easily

Courier SFTA allows you to securely send files and folders of any size – including gigabyte-sized – to recipients at any location and organization. Senders receive a download receipt whenever a file is downloaded. By moving file transfer to the dedicated SFTA appliance, user and administrators will also notice improved email server performance and the end of restrictive file attachment quotas.

Reduce cycle time while eliminating FTP servers and CD burning

Solutions such as FTP servers require on-going administrative resources for setting up the server, accounts, passwords, and managing security, coupled with end user training and maintenance. End user solutions, such as burning CD's and sending them overnight increase cycle time, lessen collaborative intensity, and drive up costs.

Achieve Sarbanes Oxley and regulatory compliance

Courier *Standard* SFTA offers a key component in implementing the secure and auditable file transfer processes required for meeting IP security needs and compliance mandates such as Sarbanes-Oxley Section 404, 21 CFR Part 11, HIPAA, Department of Defense (DOD) 5015.2, and Securities and Exchange (SEC) Act Rules 17a-3 4 (17 CFR 240,17a-3,4).

Key Features

- Send folders and files up to 20GB in size with one click
- End-to-end file security
- Outlook/Notes integration*
- External send back
- Web-based management console
- Automated download receipt
- File auditing and tracking
- Directory Services integration*
- Automated file and account management

* Not available with ACA100

Enterprise SFTA Only Features

- Local and remote data replication
- Multi-site support
- Storage/SAN integration

Affordable Prices

- *Standard* SFTA starts at USD3,500
